

Progress Targets Action Plan 2014-2015

The district has taken the following steps to help us meet our state-mandated target in math on the NJASK:

- A. We will continue an additional in class special education support for special education students within the Middle School math classes. This team teaching approach allows our most at risk students to be taught by our Math teacher and to receive additional support through a special education teacher in small group.
- B. We will continue to implement a Title I pullout class in math for regular education students who failed the math portion of the NJASK in 2012. This additional math class will ensure that these students receive ample support in preparation for the NJASK.
- C. We have integrated several technology components within the curriculum and lessons. These include iPads, online standards based assessments, and Smart Boards.
- D. We have realigned our curriculum and teaching materials school wide to better align with the Common Core Standards.
- E. We are sending staff members to several professional development opportunities that offer techniques to incorporate a standards based curriculum in preparation for PARCC.
